This is provided for your information only and is not intended to constitute any offer or solicitation or advice for the purchase or sale of any Debt Securities. Save to the extent provided otherwise in the Terms and Conditions for Accounts and Services or other applicable terms and conditions, information in this document has been prepared without taking account of the objectives, financial situation or needs of any particular investor. Accordingly, investors should, before acting on the information, consider its appropriateness, having regard to their own objectives, financial situation and needs. Any decision to purchase Debt Securities mentioned herein should be made based on a review of your particular circumstances with your independent financial adviser. This is an investment product. The investment decision is yours but you should not invest in this product unless the intermediary who sells it to you has explained to you that the product is suitable for you having regard to your financial situation, investment experience and investment objectives. Information contained in List of Debt Securities are composed as of the date of the publication and are subject to changes from time to time without prior notice.

Debt Securities are not bank deposits and involve risks, including the possible loss of the principal amount invested. Debt Securities are not protected deposit and not protected by the Deposit Protection Scheme in Hong Kong. Investors investing in Debt Securities denominated in non-local currency should be aware of the risk of exchange rate fluctuations that may cause a loss of principal. Unless specified, these investments are not obligations of or guaranteed by Citibank (Hong Kong) Limited, Citibank, N.A., Citigroup Inc., or any of its affiliates. Investment services are not available for U.S. persons and might only be applicable to limited jurisdiction. Debt Securities prices may go down as well as up. Save to the extent provided otherwise in the Terms and Conditions for Accounts and Services or other applicable terms and conditions, Citibank (Hong Kong) Limited, Citibank, N.A., Citigroup Inc., its subsidiaries or affiliates accept no liability for any direct or consequential loss arising from this document. Indicative price is for reference only. There is no guarantee on the existence of a secondary market for Debt Securities. The secondary market for Debt Securities may not provide sufficient liquidity and may not be in line with the expectations of holders of Debt Securities. You should seek advice from your professional advisors as to your particular tax position, including but not limited to estate duty and withholding tax that might arise from investing in overseas products.

"Yield to Call" (YTC) is a hypothetical rate of return if investors were to buy and hold the security until the call date, and is solely for reference purpose. This yield is valid only if the security is actually called prior to maturity. It is calculated using an indicative offer price, and is based on several assumptions including a) The issuer will redeem the security at the stated call price on the next call date; b) All coupon and principal payments will be made in full and on schedule; and c) Coupon payments are reinvested at the "Yield to Call". In addition, for variable coupon / floating rate securities, this calculation uses a series of projected coupons based on assumed reference rate fixings for each relevant coupon period. This calculation does not take into account coupon deferral or non-cumulative features and/or situations where the issuer may exercise discretion over coupon payments. Investors should be aware that the actual return may be significantly less than the calculated return (or even suffering from a loss), given that the calculation is based on various assumptions aforementioned which may not be met in actual case.

"Yield to Maturity" (YTM) is a hypothetical rate of return if investors were to hold the security until maturity, and is solely for reference purpose. It is calculated using the indicative offer price, and is based on several assumptions including a) The issuer will redeem the security on the reference maturity date and b) All coupon and principal payments will be made in full and on schedule; and c) Coupon payments are reinvested at the "Yield to Maturity". In addition, for variable coupon / floating rate securities, this calculation uses a series of projected coupons based on an assumed reference rate fixings for each relevant coupon period. For securities with no stated maturity dates such as perpetual Debt Securities, this calculation uses an assumed "Calculation Maturity Date". This calculation does not take into account coupon deferral or non-cumulative features and/or situations where the issuer may exercise discretion over coupon payments. Investors should be aware that the actual return may be significantly less than the calculated return (or even suffering from a loss), given that the calculation is based on various assumptions aforementioned which may not be met in actual case.

Notes on Product Risk Ratings

The numeric product rating of a product is an indication of its risk on a scale of 1 to 6, where 1 is the lowest and 6 the highest risk category.

Higher product risk ratings will tend to primarily reflect greater volatility of the market factors affecting the product's value than for lower risk products. Higher product risk ratings also apply to products with restrictions on redemptions, products that are infrequently traded or other factors affecting the determination of a realizable market price. The Product Ratings are not intended to consider additional risk factors that are external to the product. Examples of such external factors include investments funded with loans and translation risk of products denominated in currencies other than the investor's home currency.

The following descriptions provide general guidance on what product ratings are intended to indicate. Investors must understand that market conditions change and the product's risk may increase or decrease over its life. If you require further clarification on product ratings, please ask your Relationship Professional.

產品風險評級

產品的風險評級以數字1至6指示，其中1為最低風險，6為最高風險類別。

相對於較低風險評級的產品，較高風險評級的產品的價值會因市場因素變化作出較大的波動。較高的風險評級亦適用於贖回受限制的，低成交量的，或受其他因素影響訂定可實現淨值的產品。產品的風險評級反映了產品的相對風險，但不旨在考慮產品以外的其他風險因素。這些其他風險因素包括以貸款作為資金來源和以非投資者當地貨幣計價的產品的換算風險。

以下是各個產品風險評級的概括說明。投資者必須明白，市場狀況可能隨時改變，產品風險亦可能會提高或降低。如果閣下對產品的風險評級需要更詳細的解釋，請向您的客戶經理查詢。

Product Risk Ratings [^] 產品風險評級 [^]	Descriptions of Product Risk Ratings Note: the term 'risk of loss' as used below refers to an indication of a product's susceptibility to a negative change in its realizable value over a one year period in normal market conditions. 產品風險評級說明 備註: 以下「損失之風險」是指在一年內，該產品於正常市況下其資產變現價值對負面影響的敏感程度。
1	Risk of minimal losses over a one year period (or over product tenor if less than one year) and high certainty of being able to sell quickly (less than a week) at a price close to the recently observed market value. 於一年內(或於產品年內若年期少於一年)，持有該產品存在最低限度損失之風險，而且預期很大機會能夠以非常接近市場定價的價格迅速出售(少於一星期)。
2	Risk of small losses over a one year period (or over product tenor if less than one year) and high certainty of being able to sell quickly (less than a week) at a price close to the recently observed market value. 於一年內(或於產品年內若年期少於一年)，持有該產品存在小部分損失之風險，而且預期很大機會能夠以非常接近市場定價的價格迅速出售(少於一星期)。
3	Risk of moderate losses over a one year period (or over product tenor if less than one year) and reasonable certainty of being able to sell quickly (less than a week) at a price close to the recently observed market value. 於一年內(或於產品年內若年期少於一年)，持有該產品存在中等程度損失之風險，而且預期於合理情況下能夠以非常接近市場定價的價格迅速出售(少於一星期)。
4	Risk of significant losses over a one year period (or over product tenor if less than one year), mitigated by a reasonable certainty of being able to sell quickly (less than a week) at a price close to the recently observed market value. 於一年內(或於產品年內若年期少於一年)，持有產品會因存在大幅度損失之風險，但該產品仍能夠於在合理情況下能夠以非常接近市場定價的價格迅速出售(少於一星期)。
5	Risk of very significant loss, potentially up to the initial capital invested, and may be difficult to sell or close for an extended period or have an uncertain realizable value at any given time. 該產品存在非常大幅度損失之風險，甚至喪失其全部投資金額，而且可能於短時間內難以出售或結束或於任何特定時間內不能確定其變現價值。
6	Risk of very significant loss, potentially beyond the initial capital invested, and may be difficult to sell or close for an extended period or have an uncertain realizable value at any given time. 該產品存在非常大幅度損失之風險，甚至損失大於其投資金額，而且可能於短時間內難以出售或結束或於任何特定時間內不能確定其變現價值。

[^] Product Risk Rating of Loss-absorption products involving leveraged investment (new loan drawdown only) will be classified as 6 (highest risk). For products with a Product Risk Rating of PR1 or PR2 that are denominated in a currency other than your Reference Currencies according to IRPQ, the Product Risk Rating will be adjusted.

[^] 涉及槓桿投資(限於新貸款)之吸收虧損產品的風險評級將被分類為第6級(最高風險)。如產品之風險評級為1或2而該產品之貨幣並不是您在風險評估問卷中選擇的參考貨幣，此產品之風險評級會上調一級以進行風險評估。
